

- To develop and extend my knowledge of locations, places, environments and processes and of social, political and cultural contexts across the world.
- To develop and extend my abilities in a range of skills (including those used in fieldwork) and apply sound enquiry and investigative approaches to questions and theories (study like a geographer).

In Year 11...

- I will apply my learnt skills on case studies and investigate the effects on people and environment.
- I will apply my existing skills to fieldwork investigations, using a range of techniques and methods.
- I will be prepared to answer a range of questions with a key understanding of the Geography command words.

In Year 9...

- I will develop my data analysis skills and apply my learning to a range of geographical questions.
- I will gain knowledge of the impact of the global use of natural resources and the need for sustainability.
- I will develop an appreciation of the inequalities of provision of resources and learn how to become a more active citizen.

In Year 7...

- I will develop an understanding of and learn to distinguish between physical and human geography.
- I will learn to investigate the world on local/national level to identify places on maps at a range of scales and types.
- I will learn how to ask geographical questions and think critically to expand my personal experiences of geography.
- I will explore the process, features and impacts of river landscapes and how these can be managed.

In Year 10...

- I will investigate the many environmental challenges and make links between them.
- I will gain knowledge of the key ecosystems and people of the planet.
- I will develop my skills of using case studies as evidence to improve my knowledge of key geographical processes and environments.
- I will explore the causes and consequences of uneven development and differences between countries

In Year 8...

- I will investigate geographical issues such as weather and coastal management and consider the impact they have on a local, national and international level.
- I will develop my thinking on urban development and how, with planning, the future may be more sustainable.
- I will gain knowledge of changes to population and settlement in the UK.
- I will demonstrate an ability to explain where, how and why certain events happen and may effect/impact on lives
